PROFESSIONAL SUMMARY

Full-Stack MERN Developer with real-world startup experience building AI-integrated, real-time, and B2B web applications. Proficient in React.js, Next.js, Node.js, NestJS, TypeScript, and MongoDB. Delivered 20+ RESTful APIs, engineered secure JWT/RBAC authentication systems, and shipped pixel-perfect UIs from Figma to production. Experienced in AI-assisted development workflows and integrating AI APIs into full-stack applications. Driven by a strong problem-solving mindset and fast-paced startup environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C, C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Chart.js, Responsive Design
Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, RBAC, WebSockets
Databases: MongoDB, MongoDB Atlas, MySQL, Firebase
Cloud & Platforms: Vercel, Git, GitHub, Postman, VS Code, Figma
AI Dev Tools: Cursor AI, Claude, ChatGPT, Stitch AI, Antigravity AI

EXPERIENCE

AI Automation Engineer — NestUp Modular Space | Hyderabad, India | May 2026 – Present

- Developing assigned web portals for internal manufacturing workflows (material arrival, cutting, packing, delivery) as part of a full-scale company operations platform rebuild using the MERN stack.
- Building a synchronized multi-portal system enabling real-time coordination across separate operational teams within the modular furniture production pipeline.
- Building a synchronized multi-portal system enabling real-time coordination across separate operational teams within the modular furniture production pipeline.

MERN Stack Developer — myMooment Technologies Pvt. Ltd. | Remote | Feb 2026 – May 2026

- Architected and delivered 10+ responsive React.js frontend modules by translating Figma designs into production-ready components, integrating RESTful APIs for seamless data flow.
- Reduced UI-to-API integration bugs by ~30% through close collaboration with backend engineers to standardize data contracts, optimize payloads, and resolve cross-layer issues.
- Maintained modular, scalable codebases via Git-based workflows (branching, PRs, code reviews), ensuring consistent delivery velocity across sprint cycles.

Backend Developer Intern — NestJS — Govigi B2B E-commerce Startup | Remote | Nov 2025 – Feb 2026

- Designed and deployed 20+ production RESTful APIs using NestJS and MongoDB covering authentication, product management, cart, order processing, and digital wallet systems.
- Engineered JWT-based authentication with RBAC, securing all API endpoints across multiple user roles and eliminating unauthorized access vulnerabilities.
- Optimized MongoDB query structures and adopted modular service-based NestJS architecture, improving API response consistency and reducing data retrieval latency.

University Innovation Fellow — Stanford University d.school | Enschede, Netherlands | Oct 2023 – Present

- Represented Aditya College at the UIF Global Summit (University of Twente, Enschede, Netherlands), collaborating with international fellows to prototype sustainability-focused innovation solutions using design thinking.

PROJECTS

Real-Time Water Quality Monitoring System | MERN Stack + IoT + WebSockets | Aug – Nov 2024

- Built a full-stack IoT monitoring platform tracking 4 water quality parameters (pH, temperature, turbidity, dissolved oxygen) with sub-second refresh rates via WebSocket-based live data streaming.
- Developed a React.js + Chart.js real-time dashboard connected to MongoDB Atlas for persistent time-series storage, delivering live visualization and historical trend analysis in a single UI.

Yumegaku — AI-Powered Japanese Learning Platform | MERN + Next.js + OpenAI API | Apr – May 2025

- Integrated OpenAI API to deliver intelligent PDF translation, automated summarization, and text-to-speech features, reducing manual document processing effort by ~70% for end users.
- Implemented AI chat history and translated content as downloadable PDFs via react-render-pdf, improving accessibility and UX across multilingual workflows.

EDUCATION

B.Tech in Computer Science (IoT) — Aditya College of Engineering & Technology | Oct 2022 – Apr 2026 | CGPA: 7.54/10

CERTIFICATIONS

ReactJS — Infosys | Git & GitHub Essentials — IBM | AI & Prompt Engineering — IBM | MongoDB — GeeksforGeeks | C++ — Codio | Web Development — IBM Skill Build
